

Attack-aware PolyIoM protected-template generation

1 BIOMETRIC INPUT

2 FROZEN ENCODER

3 KEYED POLYNOMIAL HARDENING

4 IoM-GRP PROTECTED TEMPLATE

Every starred quantity is selected once on development identities, then frozen for all held-out and external evaluation

K^* polynomial key o_m^* group overlap M_m^* groups q_m^* projections per group τ_m^* decision threshold (Figure 2)
